Sallegra® Remote App for iPhone and Android

Sallegra® is a Swiss-made building automation system compatible with numerous interfaces such as Sallegra® Bus, KNX, DALI, Modbus, EnOcean and many others.

With the Sallegra® Remote App you have your house under control – both inside and outside. Control and regulation of light, scenes, shade, heating, air conditioning, multimedia and security, simply by using your smartphone. Even video signals from external cameras outside can be displayed with the Sallegra® Remote App.
The clear and easy-to-use user interface displays all the functions clearly and enables fast and comfortable handling.

The Sallegra® Remote App communicates with all Sallegra®-based systems and can control almost anything from anywhere.

What can be controlled:

• Switching on and dimming lights
• Coloured lights such as LEDs (RGBW), etc.
• Scenes (scenes can both be created and modified)
