

Datasheet

2N IP Licenses

The 2N IP intercom delivered as basic version is equipped with the necessary basic functions. Additional features can be activated anytime via a license upgrade. Only the **2N IP Uni and IP Base** as entry model cannot be extended by any other features via license upgrade.

A combination of different licenses is possible. To request one or more licenses, please contact our sales team and keep the serial number of the respective 2N IP intercom at hand.

For testing purposes, the gold license can be activated once as test version in any 2N IP intercom (except IP Uni and IP Base) for 800 hours. After the trial period the functionality automatically resets to the basic version.

Overview of licenses:

Features of licenses	Extended audio license 9137905	Extended video license 9137906	Extended integration license 9137907	Extended safety license 9137908	NFC license 9137915	Gold license 9137909
