

Compatible with most commercially available automation systems and subsystems

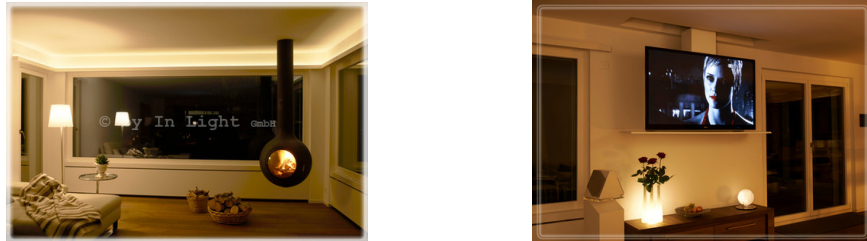

Heating, ventilation and air-conditioning

Household appliances, household robots, garden irrigation

Lighting / ambient lighting / light scenarios

## The Sallegra World of Opportunities

Take advantage of the technology of the 21st century with Sallegra® building automation technology - that will change your life!

Sallegra® will greatly simplify your life, offering you luxury and comfort to a degree you never imagined! Sallegra® is so intelligent and versatile that each system can be adapted to the specific needs of its user, making the control of your home or industrial premises simply child's play, no matter what make of control you prefer or wherever you are.

With one press of a button you can control whole building complexes, for example setting the temperature, light, access, video, hi-fi, air-conditioning, windows and security systems. Thus you are always in control and can relax and concentrate on your work and other activities.
